JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The Geology of Vancouver and Vicinity

By EDWARD M. J. BURWASH

14 half-tones, 10 line drawings, and 2 colored maps

A thorough and authoritative survey of the region, made more interesting by the remarkable photographs, which include a profile of the Grouse Mountain spur, the Lions from Mount Brunswick, a view of Red Mountain from Black Tusk Mountain, Mount Garibaldi from the south, a glacial section from a cutting on Keith Road, and others equally interesting. One colored map shows the topography of Vancouver range and the other is a geological map of Vancouver and vicinity.

112 pages, paper covers; \$1.50, postpaid \$1.60

Source Book for the Economic Geography of North America

By **CHARLES C. COLBY**

Assistant Professor of Geography, the University of Chicago

The fundamental idea of the book is to make available to the busy teacher the material on this subject which is scattered widely through literature. The course which has been given for a number of years at the University of Chicago has resulted in the collection and organization of the material most suitable for the purpose.

The book contains short magazine articles and materials from Canadian, Mexican, and United States government publications. The selection of the material has been governed by the concept that there is a direct relation between the environment and the economic activities of the region. The author aims to survey the different sections of the country from the viewpoint of industrial opportunity.
